

AUTO ADJUST FOR THE BOARDRUNNER

Automate your glue station setups

Valco Melton's BoardRunner Gluing Station delivers precise adhesive application with perfect contact for every box. The AutoGap Adjustment feature allows operators to setup for different flute sizes electronically, eliminating the need for manual gap adjustments.

Eliminates manual adjustments, reducing setup time and operator error.

Automated air pressure adjustment stabilizes corrugated boards for smooth operation.

- **No Manual Adjustments Required:** Operators can adjust the gap without using a wrench or entering the machine.
- **Preset Flute Size Settings:** Four pre-set flute sizes can be selected for different corrugated board thicknesses.
- **Electronic Control:** The flute size setting is adjusted using an external operator interface box.
- **Adjustable Air Pressure:** The operator can choose between four different air pressure settings, ensuring proper contact pressure for all box types.
- **Consistent and Repeatable Adjustments:** Once the flute size points are set during installation, operators can adjust settings through the interface box.

Ensures repeatable and precise flute height adjustment control for consistent glue application.
