

ECOSTITCH LITE

24V Electric dispensing applicators

EcoStitch Lite delivers the proven performance of our electric adhesive dispensing technology in a value-engineered design. Built on our established MXM valve platform, EcoStitch Lite provides direct 24VDC integration, eliminating the need for voltage amplification equipment. This addresses the practical needs of less demanding production environments that seek reliable, low-maintenance adhesive application systems.

- Ideally suited for standard speed applications, including some common processes in the packaging industry.
- Eliminate compressed air dependency
- Reduce spare parts consumption and associated inventory costs
- Minimize maintenance-related downtime with our reliable electric operation
- 24VDC operation for simpler integration, no voltage amplification required
- Increase OEE & decrease TCO

Optional insulated covers for better thermal stability and energy optimization

Compatible with existing melter systems for easy retrofits

Compatible with industry standard bracketry
